

LI-ION BATTERY 1800MAH 3.7V

Weight 33 g

DESCRIPTION

This lithium-ion battery is small, light and durable. Through standard JST 2mm female connector, it will yield 3.7V which will supply your projects for a whole day (and night!). Furthermore, the battery has an implemented protection system, which prevents high voltages (prevents over-charging), undervoltage and short circuit. That way it protects the battery, increases its lifetime and protects you from possible accidents!

- **Nominal voltage:** 3.7V
- **Capacity:** 1800mAh, 6.66Wh
- **Dimensions:** 60 x 31.4 x 8mm
- **Standard JST-PH-2mm connector**

DISCLAIMER: This battery has to be charged with a special charged that uses **CC/CV** principle. Li-ion batteries are dangerous! Read our tutorial (link in the top right corner) before use.

FEATURES

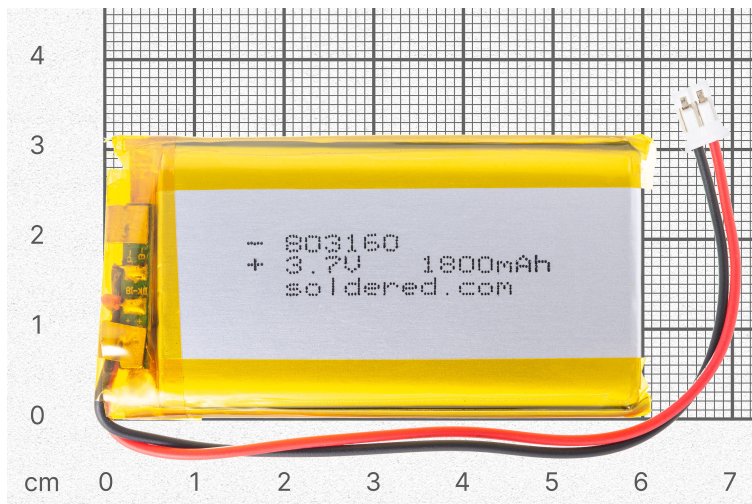

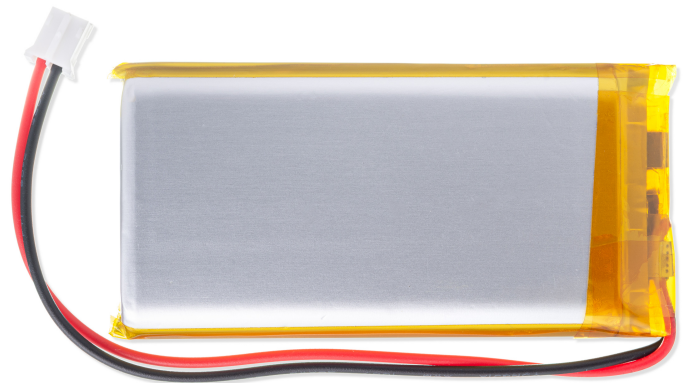

- Nominal voltage: 3.7V
- Capacity: 1800mAh, 6.66Wh
- Standard JST-PH-2mm connector
- Dimensions: 60 x 31.4 x 8 mm / 2.4 x 1.2 x 0.3 inch
