

LI-ION BATTERY 6000MAH 3.7V

Weight 108 g

DESCRIPTION

This lithium-ion battery is small, light and durable. Through standard JST 2mm female connector, it will yield 3.7V which will supply your projects for a whole day (and night!). Furthermore, the battery has an implemented protection system, which prevents high voltages (prevents over-charging), undervoltage and short circuit. That way it protects the battery, increases its lifetime and protects you from possible accidents!

- **Nominal voltage:** 3.7V
- **Capacity:** 6000mAh, 22.2Wh
- **Dimensions:** 90.2 x 60 x 9mm
- **Standard JST-PH-2mm connector**

DISCLAIMER: This battery has to be charged with a special charged that uses **CC/CV** principle. Li-ion batteries are dangerous! Read our tutorial (link in the top right corner) before use.

FEATURES

- Nominal voltage: 3.7V
- Capacity: 6000mAh, 22.2Wh
- Standard JST-PH-2mm connector
- Dimensions: 90.2 x 60 x 9 mm / 3.6 x 2.4 x 0.4 inch
