

ELECTROMAGNETIC PODLOCK 180KG

Weight 1000 g

DESCRIPTION

The electromagnetic padlock allows the door to be locked via a microcontroller or other external system. This particular can hold up to 180kg with its electromagnet, which is an extremely high force and is intended for use in places where high security is required. When power is supplied, it activates.

It consists of two parts, an electromagnet and a piece of metal. A piece of metal is installed on the door, while an electromagnet is installed on the door jamb. Comes with all necessary mounting screws. It is waterproof and can be used in outdoor conditions.

- **Activation voltage:** 12V
- **Constant activation current:** do 500mA
- **Force if can hold:** 180kg
- **Dimensions:** 172 x 40 x 21mm
- **Waterproof**

FEATURES

- Activation voltage: 12V
- Constant activation current: do 500mA
- Force if can hold: 180kg
- Waterproof
- Dimensions: 172 x 40 x 21 mm / 6.8" x 1.6" x 0.8"
